Project Name	PocketSmart AI: Your Smart Budget and Recommendation Assistant
Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS - I want recommendations that fit my budget. - I need help choosing suitable options for my plans. - I want simple, personalized suggestions instead of comparing many choices.	THINKS - Which option will suit my budget and needs? - Can I trust the recommendations for my situation? - I want to avoid overspending and make a confident decision.
DOES - Sets a budget and explores planning options. - Compares ideas, products or services for the chosen plan. - Uses PocketSmart AI to get personalized recommendations.	FEELS - Overwhelmed by many choices and price ranges. - Concerned about spending beyond the planned budget. - Relieved and more confident when suitable recommendations are available.

BUDGET-CONSCIOUS USER

Individual planning purchases, interiors, events or jewelry
