

Project Executable Files

Date	30 September 2026
Team ID	6abc94497a3f72d0b9a67d15
Project Name	PocketSmart AI: Your Smart Budget and Recommendation Assistant
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Not provided in supplied project files
3	requirements.txt / package.json / dependency file	Not confirmed in supplied project files
4	Database schema / seed files (if applicable)	NA / no separate schema supplied
5	Environment configuration file (.env.example or similar)	Not provided
6	Deployed application URL (if hosted)	Not provided
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	NA
9	Test files and test results	Not provided
10	Demo video or walkthrough (if required)	Not provided

PocketSmart AI ? Executable Project Package

Core project files identified for submission:

- ? main.py ? FastAPI application and routes
- ? auth.py ? authentication logic
- ? models.py ? application data models
- ? gemini_utils.py ? Gemini AI integration helpers
- ? templates/ ? Jinja2 HTML templates
- ? static/ ? CSS and JavaScript assets

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

```
PocketSmart AI/
- main.py
- auth.py
- models.py
- gemini_utils.py
- templates/ (HTML / Jinja2 templates)
- static/ (CSS / JavaScript assets)
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	Not provided
Login Credentials (Demo)	Not provided
Platform / Hosting Provider	FastAPI / Uvicorn (local project)
Repository Link	Not provided
Demo Video Link	Not provided

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

Pre-requisites:

- ? Python 3.x
- ? FastAPI and Uvicorn
- ? Google Gemini API access/configuration
- ? Modern web browser

- Step 1: Place the project files in one project folder.
- Step 2: Install the Python dependencies used by the project.
- Step 3: Configure the required Gemini API credentials securely.
- Step 4: Start the FastAPI application with Uvicorn.
- Step 5: Open the local application URL in a browser.
- Step 6: Test Home Interior, Party Planner and Jewelry Planner workflows.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Gemini/API response depends on external service availability.	Retry request; verify API configuration.
2	Larger user history may require scalable persistent storage.	Use scalable database/storage as usage grows.
3	High-concurrency performance is not evidenced in supplied files.	Run dedicated load/stress testing before large-scale deployment.
