

Scalability & Future Plan

Date	15 March 2024
Team ID	XXXXXX
Project Name	XXXXXX
Maximum Marks	1 Mark

- 1

Limited capacity for very large concurrent user loads

Medium
- 2

Larger user history will require stronger persistent storage

Medium
- 3

External AI/API response time can affect performance

High

S.I

1

User Load

FastAPI web application for normal project usage

Cloud deployment, load balancing and horizontal scaling

2

Data Storage

Application models/storage layer

Scalable managed database/storage for larger histories

3

Performance

FastAPI/Uvicorn with external Gemini calls

Caching, background tasks and request optimization

4

Security

Authentication module included

HTTPS, secrets management, access controls and security testing

S.I

1

2

Data Storage

3

Performance

4

Security

Future Roadmap:

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact
-------	-------------------------------	-----------------	-----------------

Phase 2		Team ID: 6abc94497a3f72d0b9a67d15		
		Project Name: PocketSmart AI: Your Smart Budget and Recommendation Assistant		
Ph				
	Phase 1	Cloud-ready deployment and database scaling	Next iteration	Support more users and persistent data
Ph				
	Phase 2	Recommendation history and personalization	Future enhancement	Improve continuity of recommendations
	Phase 3	Caching, monitoring and performance optimization	Future enhancement	Improve response time and reliability
	Phase 4	Additional planners and richer AI capabilities	Long-term	Expand beyond current three planner modules
